

About me

Aimran Oukham

Full Stack Developer · Web & mobile

Developer with over 2 years building websites for clients and running my own projects. Comfortable on the frontend (JavaScript, React) and on the backend with Supabase, with a foundation in Python and Java. Currently an intern at Brikex, building a website and an app with React Native, while studying Multiplatform App Development (DAM) to focus fully on mobile.

Experience

Full Stack Developer — Intern

SEP 2026 — PRESENT

Brikex Current

- Building the company's website and mobile app with React and React Native.
- Migrated the project from React to React Native.
- Supabase backend and full stack work: frontend, backend and debugging, using Cursor.

Web Developer

FEB 2024 — PRESENT

Rechgo · Santa Pola

- I build complete WordPress sites with Divi and Elementor for the agency's clients, from the Figma design through to launch.
- I fix bugs and day-to-day technical issues and help the team whenever needed.
- I manage the company server: configuration, maintenance and incident resolution.

Freelance Web Developer

2023 — PRESENT

My own web development projects

- I run web projects for small businesses on my own: quoting, design, development and support.
- I build apps with React and Supabase (database, login and APIs) and Python bots to automate tasks.

Network Technician — Intern

MAY — JUN 2023

Fone · Elche

- Installed and configured antennas and routers, maintained networks and repaired equipment, solving issues on the spot.
